

# “Database of MW-Scale PV Projects in Japan 2014”

*(Published in July 2014)*

Price: 100,000 JPY/copy

Since the Feed-in Tariff (FIT) program started in Japan on July 1, 2012, development of MW-scale PV projects has been sharply increasing. More and more companies from various sectors both from Japan and overseas are getting involved in the development of MW-scale PV power plants, taking advantage of the FIT program.

This report covers a list of MW-scale PV projects (so-called “Mega Solar” projects in Japan) commissioned and in the pipeline in Japan. The list provides you with details of over 1,800 MW-scale PV projects operated by electric utilities and by other operators including local governments, businesses and NPOs. The report also covers a list of PV system integrators as well as details of the FIT program.

The list of the PV projects in an excel file will be **updated 3 times** in **October 2014, January** and **April 2015** and be provided to purchasers of this report. It is expected that the number of projects will continue increasing.

To order, please fill out the order form on the reverse side and send via facsimile to +81-3-3553-8954 or e-mail to [order@rts-pv.com](mailto:order@rts-pv.com).

Format: Printed copy + PDF + Excel files (CD-ROM)

## Contents

### 1. List of MW-scale PV Projects by Electric Utilities (36 projects)

- |   |  |
|---|--|
| 1) Installed capacity                         | 6) Financial measures used for the project |
| 2) Location                                   | 7) EPC/system integrators                  |
| 3) Name of electric company                   | 8) Suppliers of PV modules                 |
| 4) Type of application (roof, ground, cover.) | 9) Suppliers of inverters                  |
| 5) Start of operation and current status      |  |

### 2. List of MW-scale PV Projects by Operators Other Than Electric Utilities (>1,800 projects)

- |   |  |
|---|--|
| 1) Installed capacity                         | 6) Financial measures used for the project |
| 2) Location                                   | 7) EPC/system integrators                  |
| 3) Power producer                             | 8) Suppliers of PV modules                 |
| 4) Type of application (roof, ground, cover.) | 9) Suppliers of inverters                  |
| 5) Start of operation and current status      | 10) Project cost (only disclosed ones)     |

### 3. Overview of PV System Integrators

### 4. Overview of the FIT Program for FY 2014

### 5. Other Incentives for Large-Scale PV Projects

### 6. Statistics of Approved & Installed Projects under the FIT program

### 7. Examples of MW-scale PV Power Plants

- |  |   |  |
|--|---|--|
| (1) Oita Solar Power                             | (5) Kyushu Solar Farm 2, Nankan Sekia Power Plant     | (9) Novil Frontier Tsunomine Solar Power Plant |
| (2) Kagoshima Nanatsujima Mega Solar Power Plant | (6) Choshu Industry PV Power Plant                    | (10) AEON Mall Makuhari New City PV System     |
| (3) Suigo Itako Solar                            | (7) PV System for TETSUSO's Rental Storage Facilities | (11) Bit-isle Hiroshima Mega Solar             |
| (4) Komekurayama Solar Power Plant               | (8) SoftBank Kyoto Solar Park                         |  |

## Appendix

- 1 Irradiation Map of Japan
- 2 Output of PV System by Prefecture
- 3 Scheme of the Feed-in Tariff (FIT) Program - flow chart from design to power generation
- 4 Regulation under the Electricity Business Act
- 5 Format of Project Approval
